

Description

[AT-4] Responsive Design=>Excessive empty space causes poor user experience

Created: 16/Oct/25 Updated: 16/Oct/25

Status:	To Do
Project:	Agile Travel
Components:	None
Affects versions:	None
Fix versions:	

Type:	Bug	Priority:	Medium
Reporter:	Farah	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		

Steps to Reproduce:

- 1-Open any screen of the application on a mobile or tablet
- 2-Observe the layout and positioning elements

Expected Results:

The content should be well distributed across the screen, utilizing this free space

Actual Results:

about 80% of the screen is empty, with all text and input fields at the top of the screen

Screenshot 2025-10-16 025352.png

The screenshot shows a web form titled "Passenger Details" with a blue header. The form contains the following elements:

- Header: "Welcome **agileway** | [Sign off \(agileway\)](#)"
- Section: "Flights (return trip)"
- Text: "2025-01-01 to 2025-01-01 to"
- Section: "Passenger details"
- Form fields: "First name:" and "Last name:"
- Button: "Next"

Below the form fields is a large, empty blue rectangular area, outlined in red, which takes up most of the page content area. A small green circular icon with the letters "AM" is visible on the right side of this area.
